Projects

- **Atorix.com** [Link] Dec 2025 – Mar 2026
 - Developed and deployed a full-stack web application using Next.js, Express.js, and MongoDB, delivering a scalable and responsive user experience.
 - Designed and integrated RESTful APIs with efficient data handling and backend logic, ensuring smooth communication between frontend and database.
 - Managed end-to-end deployment using Vercel (frontend) and Render (backend), optimizing performance, reliability, and real-world production readiness.
- **MuleSoft Salesforce Integration API** Jul 2025 – Aug 2025
 - Built MuleSoft API integrating Salesforce CRM with country code enrichment via FIRST.org REST API.
 - Applied API-led design with RAML, error handling, structured logging, and SLA-based throttling (100 req/min).
 - Deployed on CloudHub with MUnit tests, Mule Maven Plugin, and Runtime Manager.
- **AWS Serverless 3-Tier Web Application** [Link] Feb 2025 – Mar 2025
 - Built a serverless 3-tier web app using AWS Lambda, API Gateway, and DynamoDB; frontend hosted on S3 + CloudFront.
 - Implemented AWS Cognito authentication with IAM least-privilege roles, handling 10k req/day securely.
 - Integrated CloudWatch for monitoring and troubleshooting.
